PROFESSIONAL SUMMARY

Computer Information Systems student at King Faisal University, expected to graduate in 2027. Junior Data Analyst with hands-on experience in Python, SQL, Power BI, Power Query, Excel, and dashboard design. Currently developing software development skills in web technologies, APIs, databases, and system logic, while building a strong path toward data analysis, business intelligence, and applied AI. Seeking a data analyst internship to apply analytical and technical skills to real business problems.

TECHNICAL SKILLS

Data & BI: Power BI, Power Query, DAX, Excel, KPI Reporting, Dashboard Design

Programming: Python, pandas, NumPy, matplotlib

Databases: MySQL, SQL queries, database design, ERD

Software Development: HTML, CSS, JavaScript, Node.js basics, React basics, APIs

Foundations: System Analysis, Machine Learning Concepts, Enterprise Systems

PROJECTS

Riyadh Metro Data Analysis

- Built an interactive Power BI dashboard to analyze Riyadh Metro stations, lines, and operational insights using Power Query, DAX measures, KPI cards, filters, and station-level visual analysis.
- <https://github.com/xr3g77/riyadh-metro-powerbi-dashboard>

SIYaq Analytics Dashboard

- Built an interactive Power BI dashboard to analyze SIYaq platform performance, including learners, enrollments, completion rate, course demand, marketing channels, engagement funnel, and learner distribution across Saudi Arabia.
- <https://github.com/xr3g77/SIYaq-Analytics-Power-BI-Dashboard>

CERTIFICATIONS

- Introduction to Artificial Intelligence** — KAUST Academy & King Abdullah University of Science and Technology (40 hours; Machine Learning, Deep Learning, Unsupervised Learning), 2026
- Data Analysis Bootcamp** — Hash Plus (15 hours, project-based), 2026
- AI Prerequisites: Python Basics** — KAUST Academy (powered by Coursera), 2026
- Introduction to Data Analytics** — IBM via Coursera, 2025

LEADERSHIP EXPERIENCE

Head of Data Analysis Committee — Future Tech Club

Jan 2026 – May 2026

- Lead the data analysis committee, organizing technical activities and learning initiatives for student members.
- Organized and presented one workshop and two bootcamps introducing students to Excel, Python, and Power BI.
- Designed data competitions and analytical challenges to build practical skills among club members.

Co-Founder — SIYaq

April 2026 – Present

- Contributed to building SIYaq as a data and AI learning initiative focused on practical dashboards, bootcamps, educational content, and project-based learning experiences.
- Supported the platform direction, brand identity, and learning experience for data-focused learners.

EDUCATION

Bachelor of Computer Information Systems

Aug 2021 – Jan 2027 (Expected)

King Faisal University — Al-Ahsa, Saudi Arabia. Relevant coursework: Database Design, System Analysis and Design, Enterprise Systems.
